Kirjeldus

Dell Pro Wireless Headset (WL3024)

Dell Pro Wireless Headset is a professional wireless headset designed to deliver outstanding audio quality, AI-powered noise reduction, and all-day comfort. It is ideal for hybrid work, video conferencing, and everyday business communication, where clear voice quality and reliable wireless connectivity are essential.

The AI-powered microphone noise cancellation separates your voice from background noise, ensuring clear conversations even in busy office environments. The lightweight design, adjustable leatherette headband, and replaceable ear cushions provide lasting comfort throughout the workday. The rotatable boom microphone can be positioned on either side of the headset to suit individual user preferences.

Bluetooth 5.3 supports simultaneous connections to two devices and remembers up to eight paired devices for seamless switching between computers and mobile devices. Microsoft Teams and Zoom certifications ensure excellent compatibility with today's leading collaboration platforms. Dell Display and Peripheral Manager together with Dell Audio software allow users to customize audio settings, microphone controls, Busy Light functionality, and other device preferences. The included USB-C wireless receiver and USB-A adapter provide broad compatibility with modern and legacy systems.
