Pakendi tüüp	Box
Tk pakendis	1 tk
Mudeli nimi	ADR-210B USB 2.0 A-M -> B-M active connecting/repeater cable 10m
Kaabli pikkus	10 m
USB versioon	USB 2.0

Kirjeldus

With the active USB 2.0 connecting cable AXAGON ADR-210B, 10 meters long, you will be able to connect, for example, a printer, scanner, plotter or other USB-B device to your computer. The active USB repeater cable strengthens the passing signal and allows you to connect a significantly more distant USB device than the passive cables. The range of the cable can be further extended, for example, by using AXAGON ADR-210 USB extension cable

A great advantage of the ADR-210B extension is an integrated auxiliary power supply connector. In most cases, USB bus power is sufficient, but for devices with larger power consumption the USB power supply may be inadequate and auxiliary power from the mains may resolve the problem.

The remarkably compact body of the repeater cable allows trouble-free use in electrical installation strips or cable systems. The use of a high-quality shielded cable ensures high communication speed and minimal undesirable interference.
